

BEACON THERMOGRAPHY

ADVANCED MEDICAL THERMAL IMAGING

What Is Advanced Medical Thermal Imaging (Thermography)?

Thermography is a state-of-the-art FDA approved, non-invasive, radiation-free imaging technology that creates a digital map of your body, illustrating heat patterns that may detect some condition or abnormality using a scanning-type infrared camera that measures your body's surface temperature. X-rays, mammography, ultrasound, and MRIs are all tests that only provide information on the structures found within the body, and may miss such things as active inflammation or angiogenesis (increased blood supply to growing tumor).

Why Thermography? What Can It Be Used For?

One of thermography's most common applications is in breast cancer screening. It is FDA approved as an adjunct to mammography and can increase your chances of detecting breast cancer in its earliest stages by locating irregular patterns in the breast -- conditions that occur before a noticeable lump is formed and detectable by mammography, ultrasound, x-rays and MRIs.

Aside from breast cancer, thermographic screenings can also help detect a large number of conditions and injuries. Many people choose to have full-body screening performed on a routine basis due to thermography's ability to detect conditions and diseases before they become apparent/detectable on standard diagnostic tests. Thermal changes are often the earliest sign of vascular disease, immune dysfunction, diabetes, thyroid dysfunction. It is also the earliest indication of systemic inflammation, a precursor to many diseases—including cancer.

The Gifts of Thermography

Earliest Indicators.

Allows more time to address potential issues via lifestyle changes and/or other less-invasive treatments and protocols.

Safe and Secure.

FDA registered since 1982.
Your records are private and secure.
MDs board-certified in thermal scan analysis

Easy and Pain Free.

No radiation.
No breast compression.
No pain.
No physical contact.

To schedule your scan, call us at (910) 803-2150, (727) 470-1694, or email us at shellylaine@beaconthermography.com

To schedule a free educational workshop for your friends, family, social group, church group, exercise group, or co-workers, contact us or visit our website's Events page to check out scheduled workshops in your area.

Our passion is to spread the good word about the benefits and gifts of Thermography!

"Thermography will become the standard of care for breast health monitoring in about ten years."

-- Dr. Christiane Northrup MD, OB/GYN, internationally known author of *Women's Bodies, Women's Wisdom*

"The option for breast screening that I most highly recommend is called thermography."

-- Dr. Joseph Mercola DO, internationally known author and owner of Mercola.com, The World's #1 Natural Health Website
